

Case 1: THE STREETLIGHTS

Number of Lights	10	10
Wattage	50	50
Hours of Use	12	3
Units per day	6	1.5
Units per year	2190	548
Price per Unit	13	13
Bill Every Year	28470	7118
Savings every year with Sensors	21352	
Sensor Value avg	1085	
Payback Period	7 months	

A Japanese Manufacturing Company in Mysore was looking at regulating its street lights in premises.

They wanted to control certain section of Industrial Premise with motion sensing. Hence they approached us to help them by supplying as well as installation of sensors.

Benefits:

- 1) Pay for Electricity Used
- 2) Added Security in the area of installation.
- 3) Easy on pocket

What to look for?

Street Lights / Common Area lights on without any use

What to say?

Would you like to make money while using these lights? I know someone who can do it.

Case 2: THE HOME ALONE STORY

A friend had a perennial problem of attempted robbery in their sweet heaven. The whole episode had become so frightening that the attempts were being made even when they were in the house. The worry was not for loss of belongings. The worry was for if any untoward action if they are in the house when such a thing takes place. The couple approached us to provide the right solution for the same.

We used sensors for lightings in garden areas for regular use, dawn-dusk lights for certain areas, and armed the place with our security kit. The whole attempt was to secure the area without fencing, and use lighting to confuse the miscreant whether the owners are in the house or not, including discouraging access to unwanted areas.

Result:

- 1) Difficult to know if the house is occupied or not due to lighting. Thus, confusing the burglar on what is a good time to get working.
- 2) Alarm, SMS and Phone call goes off to dedicated phone numbers when a burglary attempted
- 3) Full-proofs the CCTV work and actually adding more sense by preventing the crime than looking for clues after a crime happens.

What to look for?

The person is worried about safety of the house when travelling, day trips or night time.

What to say?

Would you like to explore options to secure the house in your absence without messy wiring? Or Would you like to prevent a robbery if attempted and also receive an alert for such an action??
